REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 14 recite a latch handle that has a handle end, a handle body and a pry nose that latches a support bar into a support receptacle. The support receptacle has a pry hole and a retaining slot. A latch retainer is also recited. Independent claim 18 recite a method for attaching a grate to a crop processing unit with a latch mechanism having a latch handle with a handle end, a handle body and pry nose and a support receptacle with a pry hole and a retaining slot. The limitations recited above in combination with the remainder of the claims are not found in the prior art of record.

The closest available prior art of record is U.S. Pat. No. 6,503,142 to Imel et al. Imel et al. discloses a crop processing unit having a grate that is removable. The grate includes a support bar 288 that is received in a support receptacle 290 on the concave and fixed by a latch 300. However, the latch 300 is not a latch handle having a handle end, a handle body and a pry nose and the support receptacle does not have a pry hole and a retaining slot. Further, Imel et al. does not disclose a latch retainer as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
